Colour	Black (BK)
Description	Available with either 'inside' or 'outside' serrated ties these two piece assemblies simply push onto an edge with thicknesses from 1.0 to 3.0mm. The high 'pull off' forces are due to the integrated metal clamp. Different Edge Clip variations are available. One version allows for cables to run parallel to the edge, whilst another allows for installation at 90 degrees to the edge. The clip is simply pushed on by hand and held firmly in place by the integrated metal clamp. No fixing hole is necessary. Combined with the outside serrated (OS) ties, specially designed to protect cables from chafing and wear, the Edge Clip family provides an excellent fastening solution.
