

Premo-Flex Cable Jumper Assemblies

molex

Premo-Flex LVDS Cable Jumper Assemblies provide off-the-shelf availability and deliver high data speeds with a robust connection, making them effective in a wide range of applications

Features and Benefits

Standard low-voltage differential signal (LVDS) FFC assemblies

Streamlined procurement of cable jumper assembly and connector through Molex. LVDS FFC connectors deliver a robust and superior signal integrity performance over long distances. Ideal for applications such as large displays and high-definition (HD) TVs

Off-the-shelf availability

Shortens design time. Simplifies manufacturing processes for LVDS applications

Cable jumper assembly options include: 1-piece (15, 24 and 33 circuits), 2-piece (30, 50 and 80 circuits) and 1-touch LVDS (41 and 51 circuits)

Offer design flexibility. Two-piece system provides strong retention. One-piece available as notched and straight and with high circuit sizes

100-Ohms-controlled impedance

Suitable for HD video displays

Higher data speed over standard FFC

50.80-to-254.00mm (2-to-10-inch) cable jumper assemblies deliver 5 to 10 Gbps; 304.80-to-355.60mm (12-to-24-inch) deliver 2 to 5 Gbps

Notching feature available on cable

The notches offer positioning and locking assistance for proper connection to mating connectors

Premo-Flex Cable Jumper Assemblies with LVDS Connectors

Premo-Flex Cable LVDS Jumpers

Applications

Automotive

Radio, CD, DVD, GPS devices
Car Infotainment

Consumer / Home Appliance

Handheld devices
Videogaming Systems
Camcorders

Data / Computing

Notebooks
Printers
Scanners
Keyboards
LCD flat panels

Industrial

Medical

Aerospace and Defense

Series 15021 – not notched

Series 15022 – notched

Series 15023 – notched

Flat-panel TVs

Videogaming systems

Car Infotainment

Premo-Flex Cable Jumper Assemblies

molex

Specifications - LVDS Cable Assemblies with Flat Flexible Cable (FFC) or Etched Polyimide

REFERENCE INFORMATION

Packaging: Box

Flame Resistance: UL 758 WV-1

Use With: One piece: LVDS cable that mates with

0.50mm pitch LVDS connector series

502231 and 502244

Two piece: Notched cable that mates with connector

series 501864 and 501786 using a plug jacket

and cover arrangement

One touch: series 502908

RoHS: Yes

Halogen Free: Yes

ELECTRICAL

Voltage: 30V AC max.

Dielectric withstanding voltage conductor to shield:

200 VAC RMS (for 1 minute)

Insulation resistance (min.): 10 Megaohms (200V DC)

Controlled impedance: 90 or 100 Ohm

PHYSICAL

Plating Material: Gold

Operating Temperature: -40 to +80°C

Humidity resistance: 48H -85C / 95% humidity

Black insulation available

Flexible construction for dynamic applications

Ordering Information

Cable Jumper Series No.	Mates with Connector Series	Pitch (mm)	Speed	End Thickness (mm)	Impedance (Ohms)	Circuits	Notched	Cable Lengths (mm)
15021	502231 502244	0.5	50.80-to-254.00mm (2 –to-10-inch) cable jumper assemblies deliver 5 to 10 Gbps; 304.80-to 355.60mm (12- to-24-inch) deliver 2 to 5 Gbps	0.30 +/- 0.05	90 or 100 +/- 10	15, 24 or 33	No	50.80 (2") 101.60 (4") 152.40 (6") 203.20 (8") 254.00 (10") 304.80 (12") 609.60 (24")
15022*	501786 using a plug jacket and cover 501864 using plug jacket and cover					30, 50 or 80	Yes	
15023*	503908			0.33 +/- 0.03		41 or 51		

*NOTE: Notching on the 15022 cable is used as a positioning and locking feature once assembled with the plug jacket (series 501783) and jacket cover (series 501784) to be a cable assembly. Plug jacket series 501783 has the locking latch on the housing.

*NOTE: Notching on the 15023 cable is for the cable lock inserted into mating connector series 503908. The mating connector 503908 is a non-zif connector and does not require a plug jacket
