BSW6440

High Isolation Absorptive SP4T RF Switch

50MHz-6000MHz

Product Description

The BSW6440 is an absorptive SP4T 50Ω matched RF switch supporting bandwidths up to 6GHz. Its high linearity performance across the temperature range makes it ideally suited for use in 3G/4G/5G wireless infrastructure and 802.11 a/n/ac/ax applications where high power and excellent performance is required.

The BSW6440 is designed with robust ESD protection circuits at all pins and packaged in an industry standard, fully RoHS2-compliant, 16-Lead, 3mm x 3mm x 0.75mm TQFN package.

The BSW6440 does not require blocking capacitors. If DC is presented at the RF port, add a blocking capacitor.

A functional block diagram is shown in Figure 1.
