### Description

### Features

### What's Included

### Software

### Support

Digilent is now a proud distributor of Measurement Computing Corporation (MCC) DAQ and data logging products. MCC is a leading supplier of data acquisition solutions that are easy-to-use, easy-to-integrate, and easy-to-support.

The USB-2001-TC data acquisition device provides a single thermocouple input channel in a small form factor, making it an ideal solution for applications that require reliable temperature measurements at a low cost. Features include built in CJC and open thermocouple detection.

Software support includes DAQami, an optional out-of-the-box application for data logging, visualization, and signal generation. Data can be viewed in real-time or post-acquisition on user-configurable displays. Drivers are included for the most popular applications and programming languages including Visual C++, Visual C#, Visual Basic®, .NET, DASLab®, LabVIEW™, Linux®, and Python™.
