Pomona®

DIP CLIPS
8 through 40 pins and
8 through 40 pin DIP Removers

ITT Pomona DIP Clip® test clips are designed for testing dual-in-line IC packages on PC boards. These devices incorporate many built-in features that assure a positive electrical connection as well as hands free testing.

- Contacts (.040" wide on lower end) are serrated for the best electrical contact.
- .025" X .028" serrated test points on upper end will accept wire wraps or mini test clips.
- Molded barriers between contacts allows live board connections without accidental shorting of contacts.
- Can also be used as an insertion tool for DIPs.
- Contacts are spring tempered Nickel Silver or Gold Plated Beryllium Copper alloy. Oxide penetrating clips have a roughened stainless steel surface treatment.
- Open back option allows probing on the chip leads while clip is attached.

Pomona's DIP Clip® test clips are perfect for emulation, field service, failure analysis, and for use with logic analyzers.
