Q: What do the different IDT suffixes mean?

A: "G" = Green. These parts exceed the RoHS requirements and eliminate halogens

"LF" = Lead Free. These parts are RoHS compliant

"8" = Reel. These are on a reel. If there is no "8" it will be tray or tube as listed on the IDT website

"I" = Industrial temp rating. No "I" would call out commercial

"M"= Military temp rating

Other suffixes, for example SA, PH, Y, etc. call out package type i.e. SOIC, DIP, TSSOP, etc.

See IDT website for more specific information
