Introducing the NEW QuickSNAP™ Lightening Bushing

Other System Attachments

High Performance Clamps

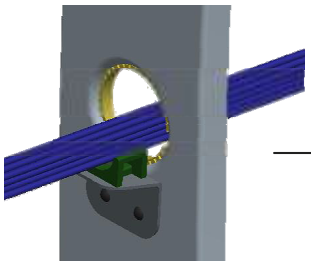

Anchor Supports

Amphenol has over 30 years experience in System Attachment technology, serving the Aerospace, Military, Industrial and extreme environment markets. The company produces high quality products and prides itself on timely and accurate delivery.

Designed to help guide wired bundles through airframe stringers and frames, Amphenol's QuickSNAP™ Lightening Bushings were designed with lean manufacturing in mind. Unlike traditional lightening bushings, our products, whether it's our one-piece design or two-piece design, significantly reduce installation times and reduce the amount of FOD on the aircraft. The lightweight QuickSNAP's are made with smooth edges in order to reduce wire chaffing, and although they are available in various standard configurations and sizes, we offer custom-made product as well.

Traditional Lightening Bushing

15 MINUTES to INSTALL!

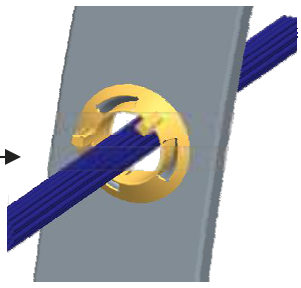

Six Part Installation

3 rivets	1 nylon part
1 caterpillar	1 sheet metal part

A better way!

Amphenol's QuickSNAP Lightening Bushing

15 SECONDS to INSTALL!

One Part Installation

1 Amphenol QuickSNAP Lightening Bushing

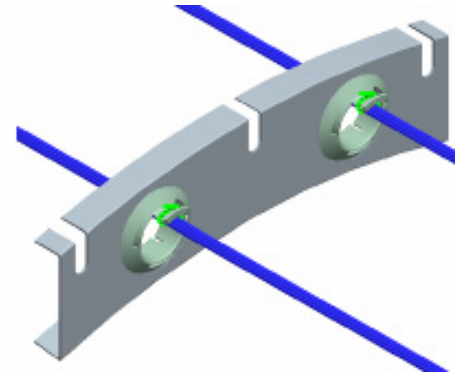

Features & Benefits

- Snap-In design makes it quick and easy to install—no tools are required
- No glue or other hard-ware is necessary—reduces FOD!
- Made of lightweight material
- Smooth edges reduces wire chaffing
- Offered in two different designs: one piece or two pieces
- Custom variations are available upon request
