Pi Supply

ModMyPi Pi Zero Cases (Various Colours)

Description

We're pleased to introduce our new range of professional, fully injection moulded Raspberry Pi Zero cases! As with all our injection moulded cases, they're designed to optimise protection whilst maintaining device useability. This Pi Zero case consist of a 3-Part clip together construction with Micro SD card cover and embossed Raspberry Pi Foundation logo, which acts as a ventilation point for heat extraction. Each case features a top and bottom GPIO cut-out, which can easily be removed using a sharp instrument, or left in situ if the GPIO is not required. There's also 2 x M3 mounting holes on the back of the case, so you can effortlessly mount your Pi Zero where it's required e.g. your belt/dog/table/wall, and two internal microSD card slots to store you spare OS images.
A kick-back from each sale even goes back to the Raspberry Pi Foundation, so you can feel as warm and fuzzy as your Raspberry Pi Zero does in its new case!

ModMyPi's Raspberry Pi Zero Case Features:
