

10W Convection cooled

AC-DC power supplies 

The VCE10 is a series of open frame and encapsulated AC-DC single output power supplies designed for low cost ITE and industrial electronics applications. Their compact design features an integral EMC filter and hold-up capacitor, so no external components are required.

The series provides two mechanical options including open frame (suffix -P) and encapsulated PCB mount. With approvals to world-wide safety standards, compliance with class B for conducted and radiated emissions and a 130%, 30s peak load capability, these class II isolation parts benefit system designers with easy integration into a wide range of applications.
