Telescopic Antenna SMA - 75 MHz to 1 GHz (ANT500)

WRL-13002

Description: This ANT500 is a telescopic antenna designed for operation from 75 MHz to 1 GHz with a total length that is configurable from 20 cm to 88 cm long. Each ANT500 is constructed of stainless steel and features an SMA male connector, rotating shaft, and adjustable elbow.

The ANT500 is a 50 ohm antenna designed to match HackRF One. It is the perfect first antenna for general purpose use with HackRF One but we won't stop you from using it with different projects!
