UHF RFID Tag - Adhesive (Set of 5)

WRL-14151

Description: Ever wanted to play with those newfangled RFID tags? Although it's been around for a while, the technology has been extremely cost-prohibitive and difficult to implement without being an RF engineer. This affordable product opens the door for using RFID in your own projects!

These paper-thin, adhesive EPCglobal Gen2 tags work with our Simultaneous RFID reader and can be stuck to practically anything you can imagine. The tags can read and be written to — and also have a kill feature. Each tag comes with a TID (Truly Unique ID) that can't be changed, but there's plenty of memory for you to write and read from.

Features:

- EPCglobal Gen2 and ISO/IEC 18000-6c
- 800 Bits of Memory
- 512 User Bits
- 64-Bit Unique TID (unalterable serial number)
- 32-Bit Access and 32-Bit Kill Passwords

Dimensions:

- Width: 2.5cm
- Length: 9.5cm
