TECHNICAL DETAILS

DESCRIPTION

Add a micro-slice standard solderless breadboard to your Perma-Proto or other perf-board. This 2x8 point solder-less breadboard is a good way to add some solderless prototyping space if you just need to have a couple points. In our example photo, we put a Trinket in the

breadboard, but you can use anything with 0.1" spaced header.

Comes with one 29mm x 8mm x 8mm piece of solder-less breadboard. There are two white posts on the bottom for PCB positioning. In our example we snapped those off and soldered two of them into our Perma-Proto.

TECHNICAL DETAILS

- 2 rows of 8 holes
- Breadboard: 29mm x 8mm x 8mm / 1.1" x 0.3" x 0.3"
- Metal pins: 3mm
- Weight: 2.2g
