TECHNICAL DETAILS

DESCRIPTION

When 0.1" is too big, and JST PH's too chunky, the ultra-slim "PicoBlade" is a reliable alternative. These are only 1.25mm pitch, but have a nice clicky connection.

This cable is nice and long, 200mm in fact. It's got both small form factor (won't take up a lot of real estate on your PCB) and friction lock to make easy-breezy connections to your HalloWing or anything else with a 1.25mm PicoBlade connection.

TECHNICAL DETAILS

- Length (including connectors): approx 200mm
- Connector Pitch: 1.25mm
- All about PicoBlade connectors
