PMC Panel Mount Power Supply

12 V 50 W 1 Phase / PMC-12V050W1A☐

PMC

Highlights & Features

- Universal AC input voltage range
- Power will not de-rate for the entire input voltage range
- Full corrosion resistant aluminium casing
- Conforms to harmonic current IEC/EN 61000-3-2, Class A
- High MTBF > 700,000 hrs. per Telcordia SR-332
- Safety approval according to IEC/UL 60950-1 (ITE standard) and EMI to EN 55032, Class B
- Also available: IP20 connector
- Certified according to IEC/EN/UL 62368-1

Safety Standards

CB Certified for worldwide use

Model Number: PMC-12V50W1A☐
Unit Weight: 0.26 kg (0.57 lb)
Dimensions (L x W x H): 128 x 97 x 38 mm (5.04 x 3.82 x 1.50 inch)

General Description

Delta's PMC series of panel mount power supply offers a nominal output voltage of 12 V, a wide temperature range from -10°C to +70°C and a highly dependable minimum hold-up time. The state-of-the-art design is made to withstand harsh industrial environments. What makes the product stands out from the crowd is its lightweight full aluminum body design, which can withstand shock and vibration according to IEC 60068-2. The PMC series also offers overvoltage and overload protection. Using a wide input voltage range design, it is compatible worldwide. The input also includes DC operating voltage from 125-375 Vdc. Best of all, this excellent design and quality does not come with a big price tag.

Model Information

PMC Panel Mount Power Supply

Model Number	Input Voltage Range	Rated Output Voltage	Rated Output Current
PMC-12V050W1AA	85-264 Vac (125-375 Vdc)	12 Vdc	4.17 A

Model Numbering

PMC	12 V	050 W	1	A	☐
PMC Series	Output Voltage	Output Power	Single Phase	Delta Standard	Connector Type A – Terminal Block J – IP20 Connector*

*Options

A J

All parameters are specified at 25°C ambient and AC input unless otherwise indicated.

PMC Panel Mount Power Supply
12 V 50 W 1 Phase / PMC-12V050W1A☐

Specifications

Input Ratings / Characteristics

Nominal Input Voltage		100-240 Vac
Input Voltage Range		85-264 Vac
Nominal Input Frequency		50-60 Hz
Input Frequency Range		47-63 Hz
Nominal DC Input Voltage*		125-250 Vdc
DC Input Voltage Range		125-375 Vdc
Input Current		< 1.1 A @ 115 Vac, < 0.7 A @ 230 Vac
Efficiency at 100% Load		> 84% @ 115 Vac, > 85% @ 230 Vac
Max Power Dissipation	0% load	< 0.5W @ 115Vac, < 1.0W @ 230Vac
	100% load	< 9.5W @ 115Vac, < 8.8W @ 230Vac
Max Inrush Current		< 30 A @ 115 Vac, < 65 A @ 230 Vac
Leakage Current		< 1 mA @ 240 Vac

*Safety approval according to IEC/UL 60950-1 and IEC/EN/UL 62368-1.

Output Ratings / Characteristics**

Nominal Output Voltage	12 Vdc
Factory Set Point Tolerance	12 Vdc ± 2%
Output Voltage Adjustment Range	11-14 Vdc
Output Current	4.17 A (50 W max.)
Output Power	50 W
Line Regulation	< 0.5% (@ 85-264 Vac input, 100% load)
Load Regulation	< 1.0% (@ 85-264 Vac input, 0-100% load)
PARD*** (20MHz)	< 100 mVpp
Rise Time	< 30 ms @ nominal input (100% load)
Start-up Time	< 2500 ms @ nominal input (100% load)
Hold-up Time	> 15 ms @ 115 Vac, > 80 ms @ 230 Vac (100% load)
Dynamic Response (Overshoot & Undershoot O/P Voltage)	± 5% @ 85-264Vac input, 0-100% load (Slew Rate: 0.1A/μs, 50% duty cycle @ 5Hz to 1KHz)
Start-up with Capacitive Loads	8,000 μF Max

**For power de-rating from 50°C to 70°C, see power de-rating on page 3.
***PARD is measured with an AC coupling mode, 5cm wires, and in parallel with 0.1μF ceramic capacitor.

Mechanical

Case Chassis / Cover		Aluminium
Dimensions (L x W x H)		128 x 97 x 38 mm (5.04 x 3.82 x 1.50 inch)
Unit Weight		0.26 kg (0.57 lb)
Indicator	Green LED	DC OK
Cooling System		Convection
Terminal	Input and Output	M3.5 x 5 Pins (Rated 300 VAC/15 A)
Wire	PMC-12V050W1AA	AWG 20-14
	PMC-12V050W1AJ	AWG 20-12
Noise (1 Meter from power supply)		Sound Pressure Level (SPL) <40 dBA

PMC Panel Mount Power Supply
12 V 50 W 1 Phase / PMC-12V050W1A☐

Environment

Surrounding Air Temperature	Operating	-10°C to +70°C
	Storage	-25°C to +85°C
Power De-rating		> 50°C de-rate power by 2.5% / °C
Operating Humidity		5 to 95% RH (Non-Condensing)
Operating Altitude		0 to 3,000 Meters (9,840 ft)
Shock Test	Non-Operating	IEC60068-2-27, 30G (300m/S²) for a duration of 18 ms 3 times per direction, 18 times in total
Vibration	Non-Operating	IEC60068-2-6, 10 Hz to 150 Hz @ 50 m/S² (5G peak); 20 min per axis for all X, Y, Z direction
Over Voltage Category		II
Pollution Degree		2

Protections

Overvoltage	16 V +10%/-5%, SELV output, Hiccup Mode, Non-Latching (Auto-Recovery).
Overload / Overcurrent	> 120% of rated load current, Hiccup Mode, Non-Latching (Auto-Recovery).
Over Temperature	< 75°C Ambient Temp@ 100% load, Non-Latching (Auto-Recovery).
Short Circuit	Hicc-up Mode, Non-Latching (Auto-Recovery when the fault is removed).
Internal Fuse at L pin	T3.15 AH
Protection Against Shock	Class I with PE* connection

*PE: Primary Earth

Reliability Data

MTBF	> 700,000 hrs. as per Telcordia SR-332 I/P: 115Vac, O/P: 100% load, Ta: 25°C
Expected Cap Life Time	10 years (115 Vac & 230 Vac, 50% load @ 40°C)

Engineering Data

Output Load De-rating VS Surrounding Air Temperature

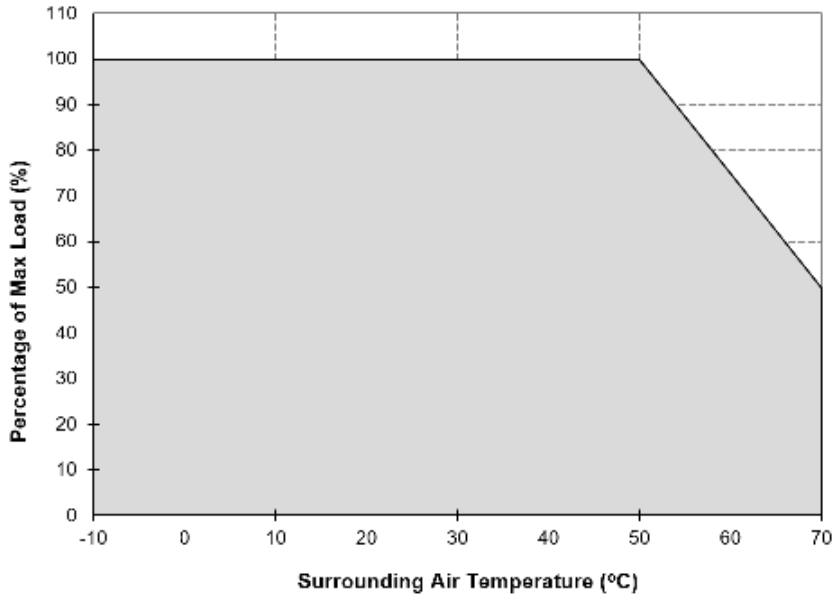

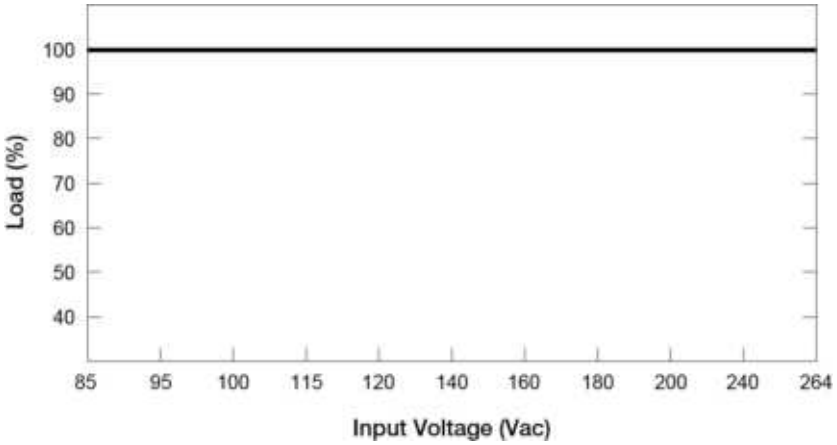

Fig. 1 **De-rating for Vertical and Horizontal Mounting Orientation**
> 50°C de-rate power by 2.5% / °C

Note

1. Power supply components may degrade, or be damaged, when the power supply is continuously used outside the shaded region, refer to the graph shown in Fig. 1.
2. If the output capacity is not reduced when the surrounding air temperature exceeds its specification as defined on Page 3 under "Environment", the device will run into Over Temperature Protection. When activated, the output voltage will go into bouncing mode and will recover when the surrounding air temperature is lowered or the load is reduced as far as necessary to keep the device in working condition.
3. In order for the device to function in the manner intended, it is also necessary to keep a safety distance as recommended in the safety instructions while the device is in operation.
4. Depending on the surrounding air temperature and output load delivered by the power supply, the device housing can be very hot!
5. If the device has to be mounted in any other orientation, please contact **info@deltapsu.com** for more details.

PMC Panel Mount Power Supply
12 V 50 W 1 Phase / PMC-12V050W1A☐

Output Load De-rating VS Input Voltage

- No output power de-rating across the entire input voltage range

Assembly & Installation

Mounting

Ⓐ Mounting holes for power supply assembly onto the mounting surface.
The power supply shall be mounted on minimum 2 mounting holes using M3 screw minimum 5 mm (0.20 inch) length.
Ⓑ This surface belongs to customer's end system or panel where the power supply is mounted.
Ⓒ Connector.

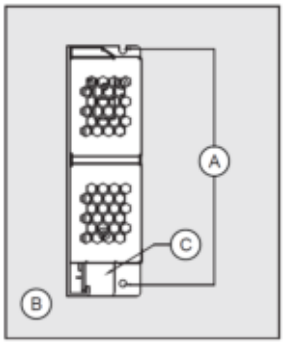

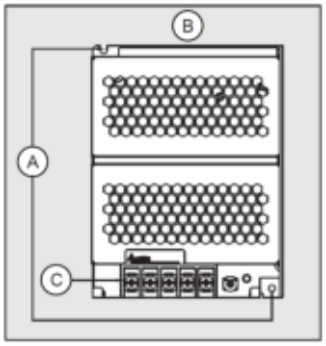

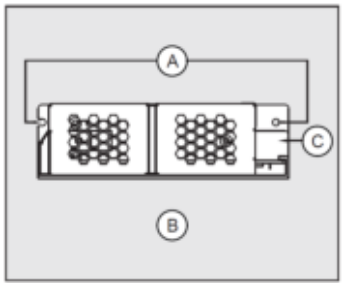

Side Mounting (Vertical)	Base Mounting (Vertical)	Side Mounting (Horizontal)
		

Fig. 2 Recommended Mounting Orientations

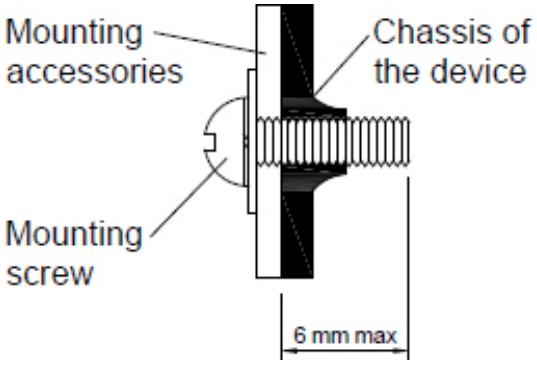

- Use flexible cable (stranded or solid) with the following sizes:

PMC-12V050W1AA	PMC-12V050W1AJ
AWG 20-14	AWG 20-12

- PMC-12V050W1AA / PMC-12V050W1AJ : The torque at the Connector shall not exceed 13 Kgf.cm. The insulation stripping length should not exceed 0.275" or 7 mm

PMC Panel Mount Power Supply
12 V 50 W 1 Phase / PMC-12V050W1A☐

Installation of Mounting Accessories

- Only use M3 screw ≤ 6 mm (0.24 inch) through the base mounting holes. This is to keep a safe distance between the screw and internal components.
- Recommended mounting tightening torque : 4~8 Kgf.cm (3.47~6.94 lbf.in)

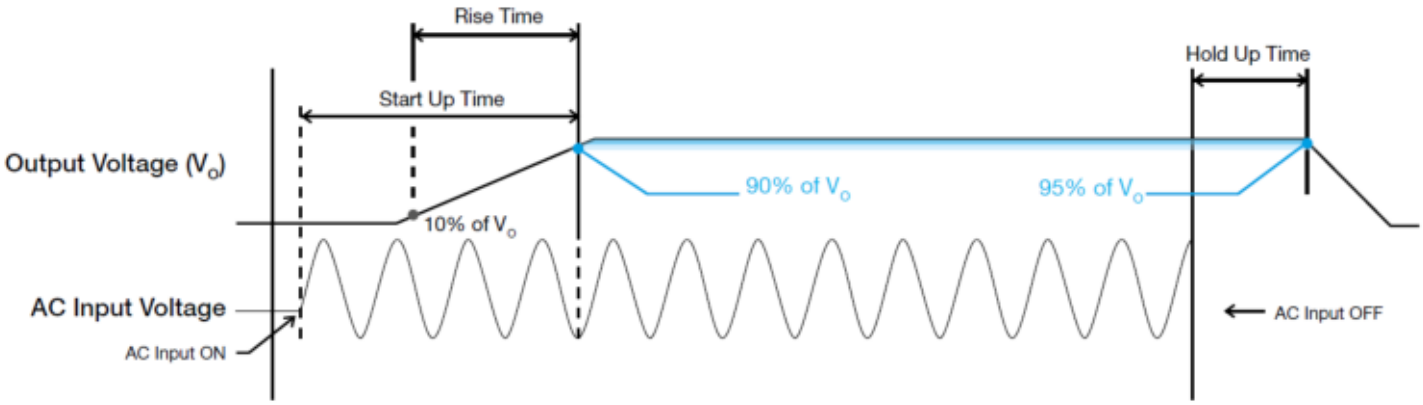

Safety Instructions

- To ensure sufficient convection cooling, always maintain a safety distance of >20 mm (0.79 inch) from all ventilated surfaces while the device is in operation.
- The device is not recommended to be placed on low thermal conductive surface, for example, plastics.
- Note that the enclosure of the device can become very hot depending on the ambient temperature and load of the power supply. Do not touch the device while it is in operation or immediately after power is turned OFF. Risk of burning!
- Do not touch the terminals while power is being supplied. Risk of electric shock.
- Prevent any foreign metal, particles or conductors to enter the device through the openings during installation. It can cause: Electric shock; Safety Hazard; Fire; Product failure
- Warning: When connecting the device, secure Earth connection before connecting L and N. When disconnecting the device, remove L and N connections before removing the Earth connection.

PMC Panel Mount Power Supply
12 V 50 W 1 Phase / PMC-12V050W1A☐

Functions

■ **Graph illustrating the Start-up Time, Rise Time, and Hold-up Time**

Start-up Time

The time required for the output voltage to reach 90% of its final steady state set value, after the input voltage is applied.

Rise Time

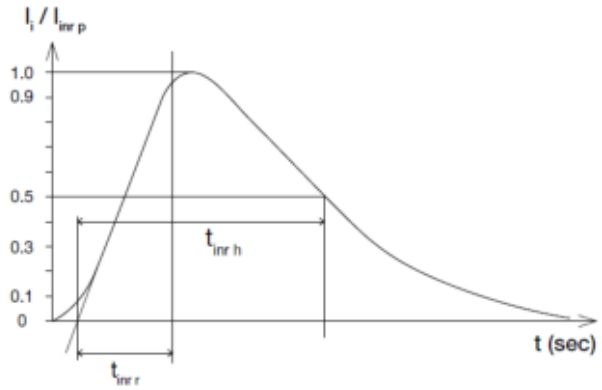

The time required for the output voltage to change from 10% to 90% of its final steady state set value.

Hold-up Time

Time between the collapse of the AC input voltage, and the output falling to 95% of its steady state set value.

Inrush Current

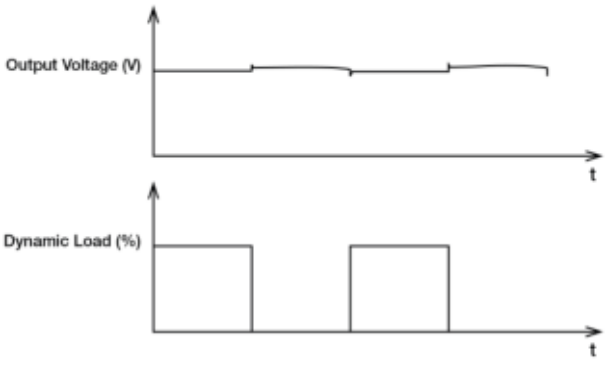

Inrush Current is the first surge current seen on the input side when AC input is applied to the power supply. It is the first pulse captured; see a typical picture for the inrush current as seen in the power supply.

Dynamic Response

The power supply output voltage will remains within ±5% of its steady state value, when subjected to a dynamic load from 0% to 100% of its rated current.

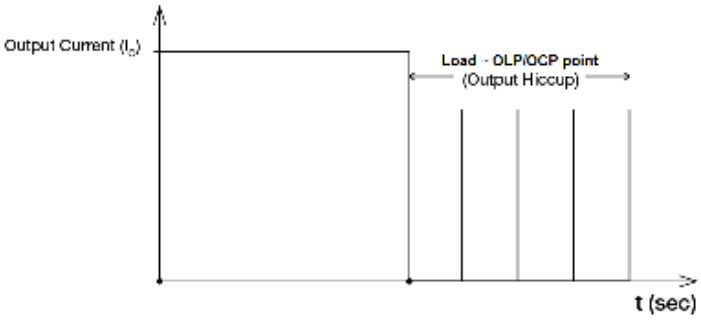

■ **50% duty cycle / 5Hz to 1KHz**

PMC Panel Mount Power Supply
12 V 50 W 1 Phase / PMC-12V050W1A☐

Overload & Overcurrent Protections (Auto-Recovery)

The power supply's Overload (OLP) and Overcurrent (OCP) Protections will be activated when output current (I_O) exceeds its specification as defined on Page 3 under "Protections. In such occurrence, the output voltage (V_O) will start to droop and once the power supply has reached its maximum power limit, the protection is activated and the power supply will go into "Hiccup mode" (Auto-Recovery). The power supply will recover once the fault condition of the OLP and OCP is removed and I_O is back within the specifications.

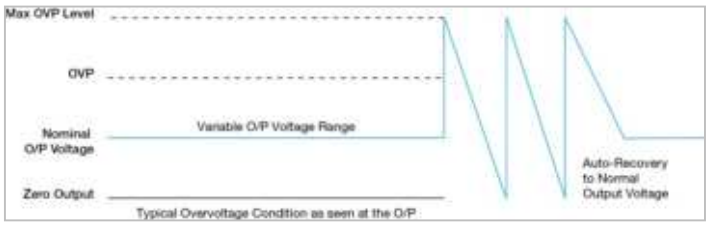

It is not recommended to prolong the duration of I_O when it is less than OLP/OCP point, but greater than 100%, since it may cause damage to the PSU.

Short Circuit Protection (Auto-Recovery)

The power supply's output OLP/OCP function also provides protection against short circuits. When a short circuit is applied, the output current will operate in "Hiccup mode", as shown in the illustration in the OLP/OCP section on this page. The power supply will return to normal operation after the short circuit is removed.

Overvoltage Protection (Auto-Recovery)

The power supply's overvoltage circuit will be activated when its internal feedback circuit fails. The output voltage shall not exceed its specifications defined on Page 3 under "Protections".

Over Temperature Protection (Auto-Recovery)

As described in load de-rating section, the power supply also has Over Temperature Protection (OTP). In the event of a higher operating temperature at 100% load, the power supply will run into OTP when the operating temperature is beyond what is recommended in the de-rating graph. When activated, the output voltage will go into bouncing mode until the temperature drops to its normal operating temperature as recommended in the de-rating graph.
