Base Loaded Mobile Antennas 450-470 MHz

TE Connectivity's ongoing commitment to refinement in mechanical and electrical design results in the most technically advanced mobile load coil antennas on the market. Exclusive features such as stainless-steel whips, housings constructed with ABS material injected molded around a solid brass insert, and gold-plated push pin contacts make TE Connectivity the obvious choice for quality and long-lasting value for demanding mobile radio communications.

FEATURES AND BENEFITS

- Long tuning ferrule allows for greater freedom in minor frequency adjustment. Tuning chart included
- High performance mobile antenna operates on a no ground plane (NGP) requirement
- Straight stainless-steel corona ball stays on the rod - no dissimilar metal interaction associated with competitor designs
- Easy installation with NMO mountable
- 100% tested on a network analyzer

APPLICATIONS

- Public safety
- Transportation
- Utility
- Military mobile
