JOHNSON™

Angled Precision RF Coax Connectors

RF Solutions

The Johnson™ Angled Precision RF PCB Mount Connectors are designed to offer mid-board launch of RF signals in tight enclosures as well as board to board applications, where there may be height restrictions for vertical mount and width restrictions for an end launch connector.

The mmWave connectors (1.85mm, 2.4mm, and 2.92mm) are designed for tight enclosures, utilizing a solderless contact to the PCB surface and two screws for quick and easy mounting to save on installation time and support frequencies up to 67 GHz. The SMA connectors support frequencies up to 26.5 GHz (30° connector and 45° connector, solderless) and to 18 GHz (45° connector, soldered, thru-hole)
